## OUR COUNTRY HAS AGAIN LAUNCHED AN ARTIFICIAL SATELLITE SUCCESSFULLY

Hsinhua News Agency, Peking: News Bulletin on Dec. 7th 1976

Under the sincere and concerned leadership of the Party Central Committee and the wise leader of the Party and commander-in-chief of the military, Chairman HUA Kuo-feng, during the great happy days over the smashing victory in smashing the conspiracy of Wang, Chang, Chiang and Yao of the "Gang of Four" who tried to usurp the highest leadership of the Party and country, our country has again launched an artificial satellite successfully on December 7, 1976.

All people who participated in the research, production and launching of the satellite had striven to respond to the great call, "We want to make a satellite also," of Chairman Mao. They firmly carried out Chairman Hua's important instructions to "thoroughly organize and delicately manage," angrily revealed and criticized the crimes of the antiparty group of Wang, Chang, Chiang and Yao of the "Gang of Four" who tried to interfere and destroy space travel, were stimulated by their positive nature and the creativity of socialism, developed greater revolutionary vigor, were serious and conscientious, were careful in considering all aspects, were united as one, and coordinated with great effort to ensure the complete success of this satellite launching. This is the great victory of Mao Ts-tung's thoughts, and the great success obtained by smashing the antiparty group of Wang, Chang, Chiang and Yao of the "Gang of Four".

The Central Committee of the Chinese Communist Party, State Council, and Central Military Commissions sincerely congratulate the workers, commanders of the People's Liberation Army, scientists, engineers, revolutionary cadres, militias and all people of concerned. They wish that the comrades be closely united around the Central Committee of the Party headed by Chairman Hua, insisting upon the class struggle as a guiding principle, insisting upon the basic guideline of the Party, insisting upon the continuous revolution under the dictatorship of the proletariat, studying the works of Marx and Lenin and the works of Chairman Mao very seriously, bringing out completely and criticizing severely the antirevolutionary crimes of the "Gang of Four", insisting upon the guideline of "Independence and self-reliance", struggling hard under difficult conditions, bursting forth for a better country breaking down superstitions, emancipating thoughts, summing up experiences, and aiming high, to make new contributions to development of the socialist revolution and socialist construction to an exceedingly favorable situation, and for the realization of modernization of industry agriculture, defense, and scientific technology of our country.
